

Autism Spectrum Disorders Program

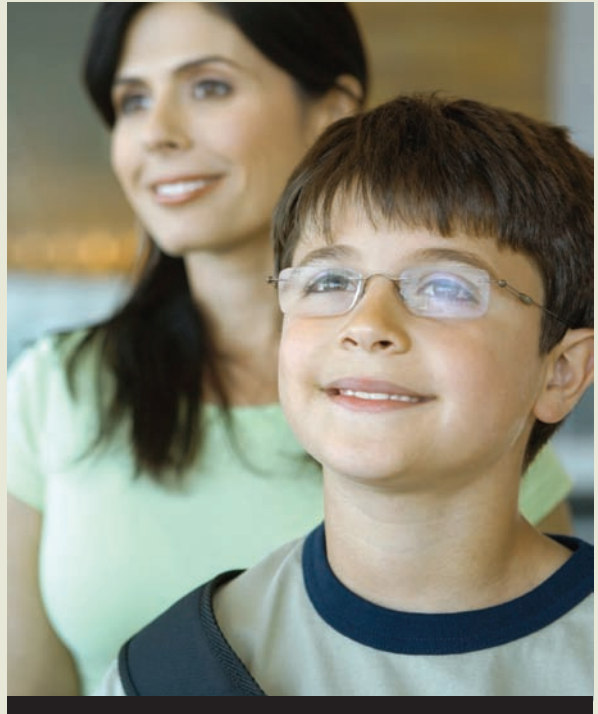

Individuals within the autistic spectrum face a variety of unique mental health challenges throughout their lifetime. The Autism Spectrum Disorders Program at Alexian Brothers Behavioral Health Hospital offers comprehensive services to assist patients in self-management, emotional regulation, and stabilization.

Our treatment program works collaboratively with the patient's family, school, or workplace to ensure an efficient and effective transfer of newly acquired skills. Family support will also be provided through family therapy, psychoeducation, and our Autism Spectrum Family Support Group. Aftercare is available to assist our patients with skill enhancement and successful reintegration back into the community.

Treatment is available for children, adolescents, young adults, and adults.

Begin here

One call is all it takes. Questions can be directed to the Alexian Autism Spectrum Disorders Program Clinical Coordinator at 847-755-8536 or by calling our access line at 800-432-5005.
