

Multi-Disciplinary Specialty Assessments (MDSA) Providers

Revised February 2008

Assessment	Treatment Center	Contact	Description
Substance Abuse & Mental Illness	Advocate Illinois Masonic Medical Center Chicago, Illinois	Elizabeth Rutha, Psy.D. Main Office Phone 773-296-3220 elizabeth.rutha@advocatehealth.com	Provide child & adolescent MDSA designed to address the complicated interaction of mental illness & substance abuse or dependence. A comprehensive, culturally-sensitive, integrated diagnostics assessment & treatment planning tool. Available in English, Spanish & American Sign Language.
Sexual Abuse and/or Sexual Behavior Problems & Mental Illness	Advocate Family Care Network/ Childhood Trauma Treatment Program Bollingbrook and Oak Lawn, Illinois	Gene Carroccia, Psy.D. 708- 684-1800 x 42-9559 gene.carroccia@advocatehealth.com	For children & adolescents who present with both mental illness and suspected or known sexual abuse and/or sexual behavior problems. Sessions include a psychiatrist session at Advocate Illinois Masonic Medical Center (in Chicago, IL) and psychological testing sessions in Oak Lawn or Bolingbrook, IL. This MDSA is intended to clarify diagnoses, assess client's difficulties and impact of sexual abuse/behaviors, and to provide effective treatment planning recommendations.
Early Psychosis Disorder or Mental Retardation & Mental Illness	Children's Memorial Hospital Chicago, Illinois	Tyler Bauer, LCPC 773-880-3136 Tbauer@childrensmemorial.org	Children & adolescents who present with both mental health & mental retardation or psychotic risk factors affecting their overall level of functioning. Sessions will include evaluation, various diagnostic assessment tools, neuro imaging or other medical tests (when indicated), psychiatric, & psychological/neuro-psychological assessments.
Neuropsychiatric	Hartgrove Hospital Chicago, Illinois	Debbie Thurston, MA, LCPC 773-413-1887	Children & adolescents who present with both mental health & neuropsychiatric risk factors. Two to four sessions will assess the level of neurological & or psychiatric disturbance. The comprehensive assessment will involve diagnostic interviews, laboratory testing & possible neuroimaging.
Behavior Modification	Streamwood Behavioral Health Center Streamwood, Illinois	Charie Motley, Psy.D. 630-837-9000x 4121 charie.motley@psysolutions.com	Children & adolescents who present both mental health & disruptive behavioral risk factors are deemed appropriate. Emotional problems and disruptive behaviors not responding to treatment.
